

*ERIC Update –
2015 Accomplishments and Future
Enhancements*

JANUARY 14, 2016

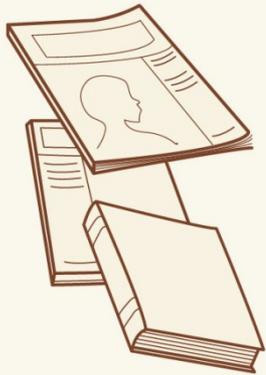

ERIC in 2015

In 2015, *12 million* people from *242* countries used ERIC.

There were more than *42 million* page views in 2015!  *Here is a look at the year in review:*

2015 ERIC Collection

Overall, 1.6 million education-related resources have been indexed in ERIC since 1966.

Our Collection

48,097 new resources were added in 2015. Of those, **36,619** were peer-reviewed. **11,681** new peer-reviewed materials with full text available were indexed — a **238%** increase since 2014!

2015 ERIC Sources

Our Sources

Overall, **1,821** education sources ([journals](#) and [other publishers](#)) provide resources to ERIC.

87 new sources were selected for indexing in 2015, including **59** new journals and **28** new sources of reports, conference papers, and other documents.

80 peer-reviewed full-text reports were received from IES grantees and contractors as a result of the [IES Public Access Policy](#).

2015 Products and Services

6 million full-text documents were downloaded by ERIC users.

 **3,840** [help desk](#) inquiries were received and answered.

64 [terms were updated](#) in the ERIC Thesaurus.

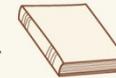

2 videos were produced: [Tips for Using the ERIC Online Submission System](#) and [The IES Public Access Policy: How Contractors and Grantees Meet Their Requirements by Submitting Work to ERIC.](#)

2 [presentations](#) on ERIC were given at national conferences. **2** [webinars](#) were held.

 **1** update was made to ERIC's [Selection Policy](#), including new criteria for identifying peer-reviewed content.

1 brand new [Infographic](#) helps explain how articles are added to ERIC.

**Our Products
and Services**

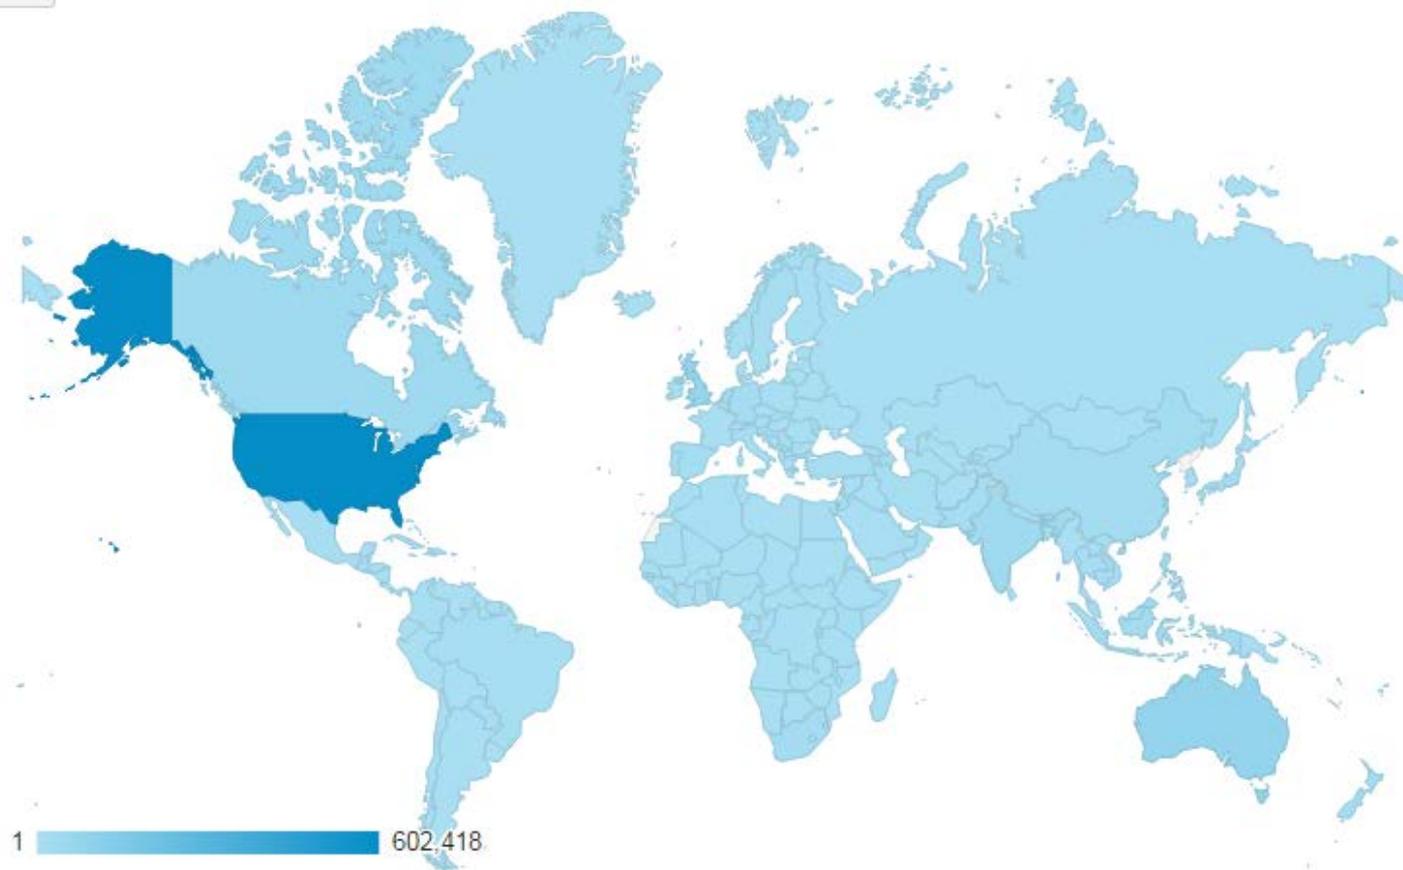

We hope you enjoyed searching ERIC in 2015 and exploring this treasure trove of education research. Keep up-to-date in 2016 by Following us on [Twitter](#), Liking us on [Facebook](#), and signing up for our [Newsflash](#). Happy New Year to ERIC searchers everywhere!

How Research Becomes an ERIC Record – Source Selection

How Research Becomes an ERIC Record – Processing and Update

Revisions to the ERIC Selection Policy

The screenshot shows the ERIC website interface. At the top, there is a browser address bar with the URL "eric.ed.gov/?selection". Below the address bar is the ERIC logo, which includes a tree icon and the text "ERIC". To the right of the logo are navigation tabs for "Collection" and "Thesaurus". Below these tabs is a search bar with the text "Search education resources" and a "Search" button. To the right of the search bar are links for "Advanced Search Tips". Below the search bar are two checkboxes: "Peer reviewed only" and "Full text available on ERIC". In the top right corner, there are links for "Notes", "FAQ", and "Contact Us".

ERIC Selection Policy

The ERIC Selection Policy establishes the standards and criteria for selecting materials for inclusion in the ERIC collection. It states broad collection goals and defines the standards and criteria required of approved sources and individual materials in the ERIC digital library. The purpose of the selection policy is to provide consistency in the approach for reviewing and selecting sources and individual items, and clearly communicate policy and process to staff, users, publishers, and individual submitters of material.

This policy was released in January 2016 and applies to new materials added to ERIC. No previously published records in ERIC will be removed as a result of this selection policy.

The following list of [journals](#) and [non-journals](#) are approved to be indexed in ERIC. New sources will be reviewed for inclusion based on the new selection policy twice a year.

[Download, view, and print the ERIC Selection Policy as a PDF](#)

Biggest Policy Change – Peer Review

- Includes an enhanced peer-review criterion:
 - Defines peer-review processes ERIC accepts (blind or expert peer review)
- Extends the peer-review flag to qualified grey literature
- Defines how the peer-review flag is applied:
 - For journals, determined at the journal level/applied to all records
 - For reports and papers, may be assigned to all content or specific series or types of publications
- Allows online submissions not funded by IES to show proof of peer review

What is the Impact?

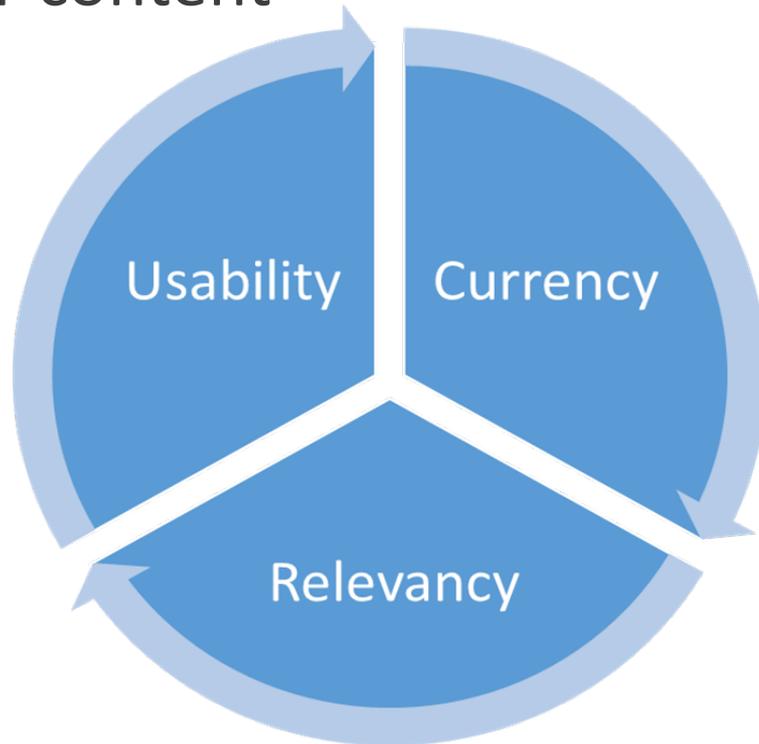

- Approximately 100 new records marked as peer-reviewed
- Peer-reviewed grey literature will appear in search results as well as journal records
- Elevate the status of grey literature
- Learn more in two archived webinars at <http://eric.ed.gov/?multimedia>
 - Changes to ERIC's Peer-Review Policy
 - ERIC Town Hall Meeting

Other Selection Policy Changes

- ***Criteria: Language*** – added requirements for multi-language journals:
 - 80% of articles must be in English
 - ERIC will only index articles written in English
- ***Preservation Policy*** – ERIC indexes materials in perpetuity

Thesaurus Update

- The Thesaurus is the backbone of ERIC– it is how we index our content

How the Thesaurus is Updated

- High level of literary warrant (more than 1,000 term occurrences in ERIC literature)
- Multiple user and ERIC indexer requests
- Promotes indexing consistency
- Reflects the language of ERIC users
- Aligns the Thesaurus with the ANSI/NISO standard

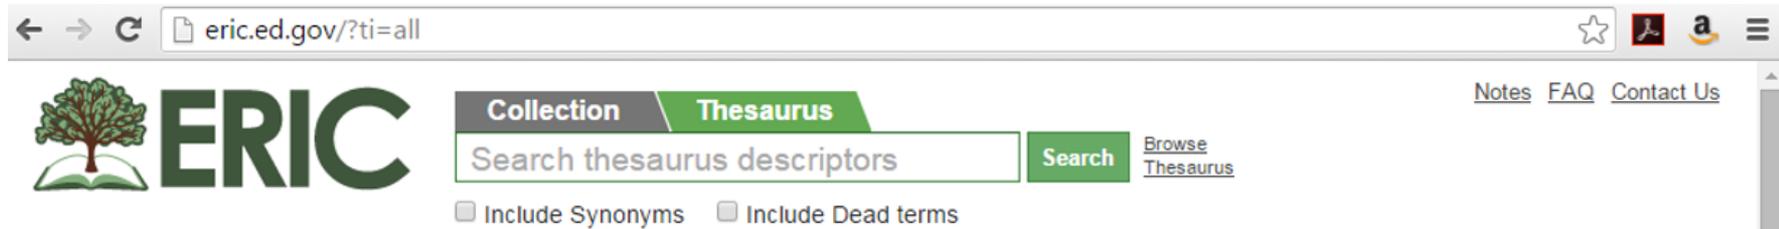

The 2015 Thesaurus Update

19 new descriptors - e.g., Common Core State Standards, Low Income Students

28 new synonyms - e.g., Cyberbullying, Principal Surveys

17 changes to existing terms – e.g., Mental Retardation is now Intellectual Disability

[Notes](#) [FAQ](#) [Contact Us](#)

Purpose and Scope

The ERIC Thesaurus is a list of terms representing research topics in the field of education. Descriptors from the ERIC Thesaurus are assigned to every document in the ERIC digital library to describe its subject content.

Terms in the ERIC Thesaurus represent the vocabulary used in the documents that comprise the ERIC digital library collection. Learn more about how the Thesaurus is updated in this archived webinar.

The ERIC Thesaurus contains a total of 11,721 terms. There are 4,520 Descriptors and 7,068 Synonyms. There are also 133 Dead terms which are no longer used as Descriptors but remain in the Thesaurus to aid in searching older records. The ERIC Thesaurus was last updated in October 2015. The updated Thesaurus includes 19 new Descriptors, 28 new Synonyms, and changes to 17 existing terms. For more information, view the full list of updates and download the updated file.

Key findings

To what extent does individual student change (growth) over the academic year statistically explain why students differ in end-of-year performance after accounting for performance on interim assessments? The four growth estimates examined in this report (simple difference, average difference, ordinary least squares, and empirical Bayes) all contributed significantly to predicting performance on the end-of-year criterion-referenced reading test when performance on the initial (fall) interim assessment was used as a covariate. The simple difference growth estimate was the best predictor when controlling for mid-year (winter) status, and all but the simple difference estimate contributed significantly when controlling for final (spring) status. Quantile regression suggested that the relations between growth and the outcome were conditional on the outcome, implying that traditional linear regression analyses could mask the predictive relations.

The Problem with the Solutions

Jules Witcover says (Columbia Journalism Review, Fall, 1970) that the one way to save the presidential press conference is for the reporters to get their heads together and agree on a plan of action. But this suggested solution cuts into the Washington reporters' prized independence, the foundation of the present system.

The Problem with the Solutions

Jules Witcover says (Columbia Journalism Review; Fall, 1970) that the one way to save the presidential press conference is for the reporters to get their heads together and agree on a plan of action. But this suggested solution cuts into the Washington reporters' prized independence, the foundation of the present system.

ERIC Identifiers

- What are identifiers?
 - Proper nouns that add specificity in indexing not possible with descriptors alone
- Three categories of identifiers:
 - Geographic Location
 - Laws and Legislation
 - Tests and Measures

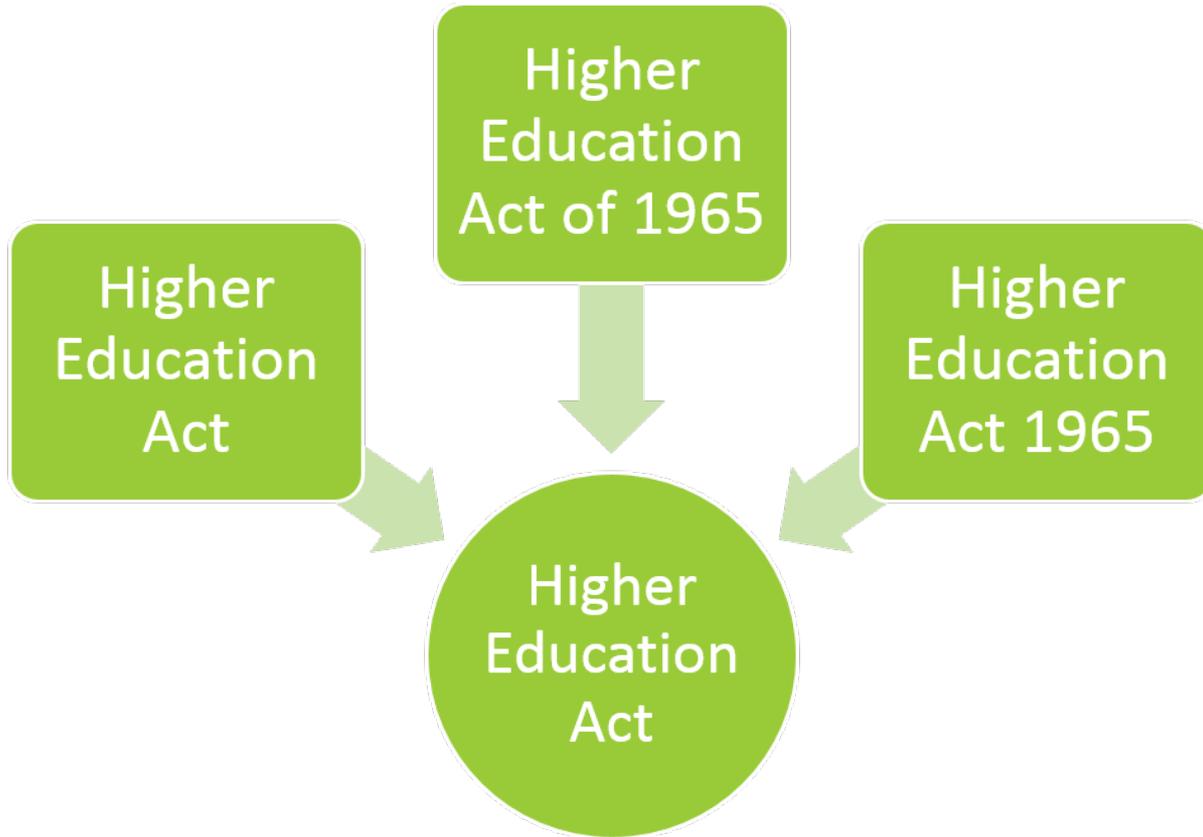

Improving the Identifier Field

Searching Using Identifiers

- Examples of searches using identifiers:
 - What work has been done in Tennessee on reading? Search reading identifier:Tennessee
 - What studies have used the FCAT as a measure of achievement? Search identifier:"Florida Comprehensive Assessment Test"
 - Are there any studies that use the Woodcock Johnson assessment in Indiana? Search identifier:"Woodcock Johnson Tests of Cognitive Ability" identifier:"Indiana"

Standardizing Language

Improving Geographic Locations

- Adding consistency to how U.S. cities are identified
 - Examples: Philadelphia, Pennsylvania (Philadelphia)
 - Approach: Standardize using the identifier format of ***State name (City name)*** for all prior records with cities and new records added to ERIC
- Eliminating state regional references
 - Examples: Alabama (Northeast), Arizona (South)
 - Approach: Convert identifiers incorporating state regions to use state names

Adding Hyperlinks to ERIC Records

- Hyperlinks will help users find more information on:
 - IES publications
 - IES grant funding
 - What Works Clearinghouse Study Review Guides

IES Publications - Example 1

Professional Learning Communities Facilitator's Guide for the What Works Clearinghouse Practice Guide *Teaching Academic Content and Literacy to English Learners in Elementary and Middle School*

The *Professional Learning Communities Facilitator's Guide* is designed to assist teams of educators in applying the evidence-based strategies presented in the [Teaching Academic Content and Literacy to English Learners in Elementary and Middle School educator's practice guide](#), produced by the What Works Clearinghouse. Through this collaborative learning experience, educators will expand their knowledge base as they read, discuss, share, and apply key ideas and strategies to help K–8 English learners acquire the language and literacy skills needed to succeed academically.

The facilitator's guide employs a five-step cycle that encourages professional learning communities to debrief, define, explore, experiment, and reflect and plan. This cycle is supplemented with activities, handouts, readings, and videos. Educators will develop a working knowledge of some of the best practices in the English learner practice guide through analysis of teaching vignettes and other interactive activities. Included in the toolkit of materials are 31 handouts and 23 videos. Four of the videos provide narrative overviews of the four recommendations in the practice guide; the remaining videos show teachers putting the recommendations into practice in actual classrooms at three different grade levels.

Grant Funding Information

The screenshot shows a web browser window with the URL <http://ies.ed.gov/funding/>. The page title is "FUNDING OPPORTUNITIES | SEARCH FUNDED RESEARCH GRANTS AND CONTRACTS". Below this, there is a section for "IES Grant" with the following details:

TITLE:	Impact of Teacher Study Groups as Observed Teaching Practice and Student Vocabulary Knowledge: A Multi-Site Randomized Control Trial in First Grade		
CENTER:	NCER	YEAR:	2009
PRINCIPAL INVESTIGATOR:	Gersten, Russell	AWARDEE:	Instructional Research Group
PROGRAM:	Teacher Quality: Reading and Writing	[Program Details]	
AWARD PERIOD:	3.5 years 7/1/2009-12/31/2012	AWARD AMOUNT:	\$2,713,610
GOAL:	Efficacy and Replication	AWARD NUMBER:	R305A090294

DESCRIPTION: **Co-Principal Investigators:** Madhavi Jayanthi, Rebecca Newman-Gonchar

Purpose: The purpose of this efficacy study is to examine the impact of the Teacher Study Group (TSG) professional development program in vocabulary on teacher knowledge, observed teaching practice, and student vocabulary achievement, when implemented with first-grade teachers in Title 1 schools. Most professional development programs only involve one- or two-day trainings, but teachers value continuous training over the course of the school year and appreciate the opportunity to develop collegial relationships with other teachers. In turn, professional development that features ongoing training and collaborative work between teachers may help teachers to improve their knowledge about a specific topic, such as vocabulary, and their use of research-based practices in their teacher, and in turn, students' vocabulary outcomes.

Project Activities: The research team will address three outcomes: teacher knowledge; teaching practice; and student vocabulary. In this multi-site cluster randomized trial, schools will be randomly assigned to treatment or control within each district. Teacher participants will work through 10 interactive TSG sessions with other teachers over the course of the school year using the TSG. Researchers will examine the impact of the TSG using hierarchical linear modeling (HLM).

Products: Products include evidence of the impact of the TSG with first grade teachers in Title 1 schools as well as presentations at conferences and peer-reviewed publications.

Project Website: http://www.inresq.org/research_projects.html

What Works Clearinghouse Study Review Guides

- Who was the study conducted on?
- What is the design of the study?
- Are there any methodological concerns with the study (e.g., regarding attrition from the study and the equivalence of the groups at the start of the study)?
- What are the results?
